

## Qualified/Approved Electrician - Metering

*Location*            *Burley in Wharfedale and various site locations*

*Salary*                *depending on experience*

*37 hours per week*    *25 days holiday*    *a vehicle will be provided for business use*

We are looking for a qualified/approved electrician skilled within the installation of three phase electric metering systems, preferably AMR/Smart metering. You will have extensive experience gained from working on commercial and industrial premises, fitting complete meter installations, changing meters, monitoring, fault finding, repairing and resolving issues.

You will be computer literate and required to work on your own initiative with the minimum of supervision. We work to provide high standards and are looking for someone capable of providing customers with expert technical advice both face to face and on the telephone.

Previous industrial and commercial meter installation experience would be advantageous. Electrical qualifications are essential and these are detailed below.

### Job Description

- Working with the minimum of supervision, carrying out complex wiring work and fault finding, to the required quality and safety standards ensuring cost effectiveness and a high level of customer satisfaction.
- Able to design metering schemes and interpret wiring requirements.
- Ensure the effective design, installation and commissioning of metering installations.
- Provide customers with sound and professional advice on their metering installations.
- Operate computerised Energyquest systems to, for example, update records and view customer information.
- Deal positively with customer queries, speedily resolving issues in the most cost effective way while ensuring that high levels of customer satisfaction are maintained.
- Excellent communication skills, ensuring that customers are kept informed throughout the duration of the work, clarifying requirements and liaising with the Energyquest office team members to ensure high standards of quality and service are maintained.
- Positively promote Energyquest and its services to increase customer awareness and satisfaction.
- Build effective working relationships, work effectively as part of a small team, and communicate regularly with the Energyquest office team as well as with senior Managers and Directors in external companies.

### The Individual

- You must be capable of working on your own initiative.
- As the public face of Energyquest you will be someone who demonstrates pride in what you do. You will be conscientious and work to high standards of quality and service whilst also focusing on costs and time.
- You will have an aptitude for working with computerised systems and an eye for detail.
- You will have excellent communication skills as well as a friendly approach.

### Essential Requirements

- Experience of undertaking installation and repairs to wiring systems within commercial and industrial premises to the highest standards of efficiency, safety and customer satisfaction.
- City & Guilds 2382 - B.S. 7671 IEE Wiring regulations electrical installation.
- City & Guilds 2360 electrical installation theory practice Parts 1 & 2 or equivalent

- City & Guilds 2391 inspection, verification of electrical installations or equivalent
- Able to demonstrate current, relevant practical experience working on three phase systems in commercial and industrial premises.
- Hold a current full driver's licence valid for use within the UK.
